

Make Dispensing and Dosing Easier!

Facts about gelatin capsules:

- * You can use capsules to accurately dose any type of dry material (powder, granule, small tablets etc.) and a variety of liquids and pastes.
- * Gelatin itself is physiologically inert.
- * You can dose orally, vaginally, post-partum or intra-uterine (large species).
- * Gelatin capsules dissolve rapidly (5-10 minutes) and completely in the stomach (rumen), vagina or uterus.
- * Torpac capsules come in 15 sizes from 0.13 ml to 28 ml.

Capsules are ideal for dispensing:

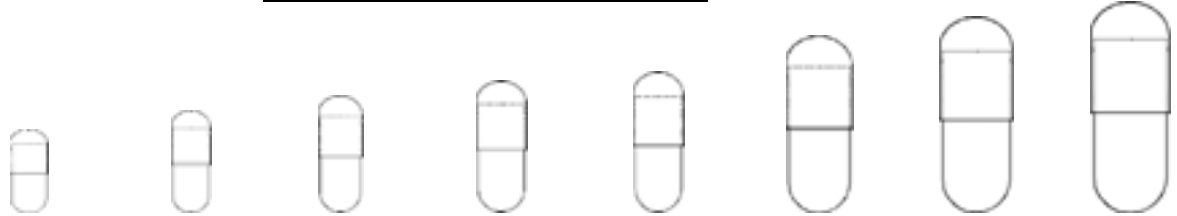

- * Nutritional products (e.g. vitamins, supplements & digestive aids).
- * Medicinal products.
- * Odorous or bad tasting materials.
- * Multiple small tablets or capsules in one easy dose.
- * Non-aqueous solutions.
- * Topical antibiotics intra-uterine (large species).
